Having gathered prestigious industry certifications, Image Civil and Electrical Engineering Ltd stands as a beacon of excellence in the field. Our commitment to quality is not merely reflected in our certificates but is ingrained in our corporate DNA. Beyond the accolades, we are a dynamic team dedicated to continuous improvement, innovation, and staying at the forefront of cutting-edge technologies.

Armed with a wealth of expertise, we take pride in being a trusted partner in our clients' success. As Image Civil and Electrical Engineering Ltd strides forward, our focus remains unwavering on delivering top-notch solutions and services, ensuring that we not only meet but exceed the expectations of our clients. We are not just certified; we are your dependable ally in navigating the complex landscapes of civil and electrical engineering.

Our commitment to sustainability and environmental responsibility is woven into the fabric of our operations. We strive to implement green practices and innovative solutions that minimize environmental impact while maximizing efficiency and effectiveness. This dedication to sustainability is reflected in our projects, which are designed to meet the needs of today without compromising the ability of future generations to meet their own.

We believe in the power of collaboration and the importance of listening to our clients' needs. By fostering open communication and a spirit of partnership, we ensure that our solutions are tailored to the unique requirements of each project. Our agile approach allows us to adapt quickly to changing conditions and emerging technologies, keeping us ahead of the curve in an ever-evolving industry.

At the heart of our success is a culture of continuous learning and improvement. We invest in the professional development of our team members, providing them with opportunities to expand their knowledge and stay abreast of the latest industry trends. This commitment to growth extends to our clients as well, as we share our expertise and insights to help them achieve their goals.

In every project we undertake, we are guided by our core values of integrity, excellence, and innovation. These principles drive us to deliver superior results and build lasting relationships with our clients. As we look to the future, we remain dedicated to pushing the boundaries of what is possible in civil and electrical engineering, ensuring that Image Civil and Electrical Engineering Ltd continues to be a leader in the field.

RE: REFERENCE FOR IMAGE CIVIL AND ELECTRICAL ENGINEERING

This serves to state the captioned company successfully carried out a Water Reticulation System upgrading project at Zambia Forestry College costing about K2million.

The works involved expanding and fencing a pump house; laying about 1.4km new 160mm and 110mm pipe line from the pump house to the filtration tanks and from there to the Over Head Tank of Zambia Forestry College. The works also involved changing the filtration media, mending and painting the tanks and fencing the filtration tank area.

During this period, the company demonstrated expertises, maturity and corporate care and is thus recommended for such works.

CSR

CORPORATE SOCIAL RESPONSIBILITY

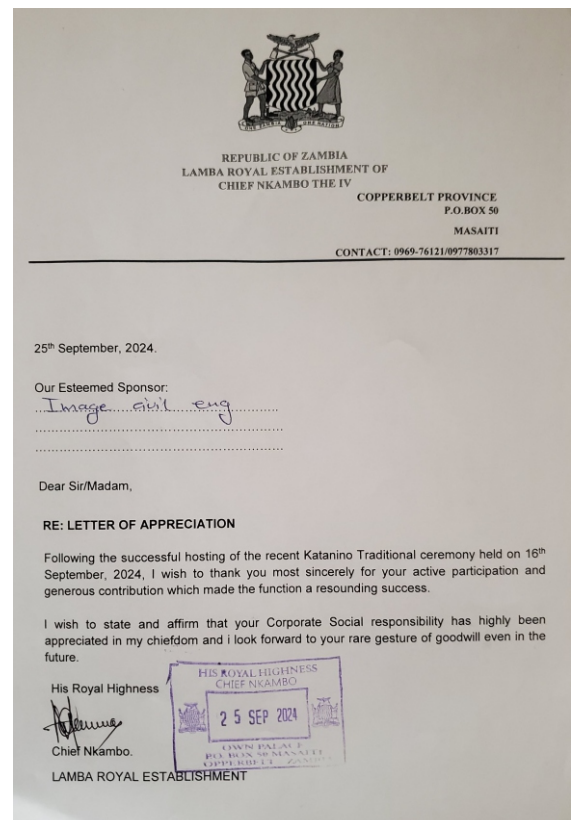

Image Civil and Electrical Engineering Ltd is proud to contribute to cultural heritage and community development by supporting local events like the Katanino Traditional Ceremony. Our involvement in the ceremony, recognized by His Royal Highness Chief Nkambo the 4th, demonstrates our commitment to preserving traditions and fostering unity within the community. By participating in such events, we not only honor our heritage but also strengthen our bonds with the people we serve, underscoring our dedication to uplifting the communities that shape our society.

Through this engagement, we aim to inspire future generations to appreciate and protect their cultural identity while embracing development. It is our belief that a community rooted in its traditions is better equipped to grow and thrive. As we work hand-in-hand with the people, we continue to reaffirm our role as not just a service provider but a true partner in progress. Together, we can build a future that respects the past while paving the way for a brighter tomorrow.

PROJECTS & REFERENCES LIST.

METHOD STATEMENT.

1. GENERAL

The foregoing method statement explains how image civil & Electrical Engineering Ltd and all their subcontractors intend to carry out procurement of construction programs, management of financial, human and including practical Completion period and the subsequent final handover of the project to satisfied user/client.

2. PROGRAMME, PLANNING MANAGEMENT AND RESOURCE STRATEGY

Image Civil & Electrical Engineering Ltd will;

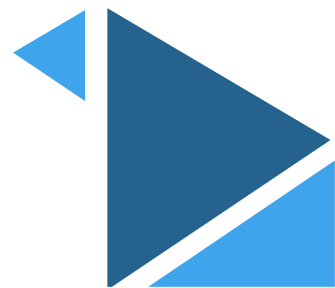

- Programme the works (including that of the subcontractors) in a professional manner clearly defining proper sequence of events for the works, taking into account required milestone achievements on program Charts.
- Programme and manage the works in such manner as required by optimizing production and reducing the time of completion, and of the project for the benefit of the client.
- Monitor work carried out by subcontractors in line with the control programme and making sure that it meets the minimum specifications. This will also be supplemented by the regular planning and technical meetings.

3. MOBILIZATION

Image Civil and Electrical Engineering Ltd will setup project management teams and mobilize a skilled workforce complimented with approved subcontractors after site handover / establishment for proper organization and Co-ordination of a given particular project and final approval of shop, drawings, and the construction programme. All members of the organization will save specific duties and responsibilities to provide a full integrated team of which the project/ Contract. All subcontractors will be managed by the "Engineering services Coordinator" who will deal with all specialized sub- contractors, technical submissions, and installation and builders drawings submissions for approval by the client or consultant which ever case may be. He will also co-ordinate and resolve any Misunderstanding between team players, and in line with the construction programme and mitigate any delays whenever they occur to ensure timeouts in completion of the projects. Regular monthly progress meetings will be held on site with all the stakeholders such as client, consultants and normal contractual meetings will be held with sub-contractors with copies of these meetings will be distributed to all consultants, clients and sub-contractors. The project construction programme will be submitted to a programme chart clearly showing the crucial path of the project with interlinked activities as well as milestones for progress accomplishment. This programme will be regularly held; to make sure that the construction progress is on schedule. We shall also carry out extensive material procurement and purchase exercise to meet the target which will include supplier quality inspections, import logistics and finally on site material delivery management and recording Regulation. Train new employees on health and safety matters. We envisage own plant where possible and supplement it with hired or purchased or specialists equipment where required.

4. COMMISSIONING AND HAND OVER OF SITE

We will synchronize this operation with client and consultants where we shall notify the stakeholder through written notice of the dates on which we shall mobilize and commence operations in terms of the contract on site: this shall normally be within 14 calendar days.

5. PRE MOBILIZATION PLANNING STAGES AND MOBILIZATION CONSTRUCTION STAGE.

We shall together with relevant stakeholders in order to determine the requirements for pre-mobilization and mobilization construction stages applicable to a site. These will include but not be limited to temporary services such as power, water and telephones arranged to pay for connections to relevant authorities, clients and consultants. Site offices, toilets, workshop e.t.c For workers, staff and subcontractors. All stages of construction will be looked at holistically in order to plan for the construction successfully.

These plans will always be received to take into account any changes, potential risks and other threats that may occur during the later construction stages.

6. QUALITY MANAGEMENT

Image operates a specific quality assurance management system. The structure of which is embodied in the quality Assurance manual and Quality Assurance policy. Our quality assurance policy states Image aims to provide defects free products and services to their customers all delivered on time and within budgets and operates a system that conforms to BSEN ISO 9001:2000 Certification and all aspects specification the provision of civil, building. Electrical and Mechanical services. To this effect IMAGE is committed to:

- Develop and improve quality assurance management.
- Continually improve the effectiveness of the quality assurance management systems.
- Enhancement of customer satisfaction
- Ensure customer needs and expectations are determined and fulfilled within the aim of achieving customer satisfaction.
- Communication within the satisfaction and importance of meeting customer needs and legal requirements are undertaken with minimum delays.
- Conduct periodic management reviews of the effectiveness of the quality assurance management system.

7. HEALTH AND SAFETY

Image being conscientious employers that they are, employ or hire the services of qualified safety, environmental and quality control officers to ensure a safe and quality assured and environmentally completed project. The following issues will normally be employed:

- ▶ Engage a fully qualified safety, health and environmental officer (SHE) to deal with safety, health and environmental related issues.

- Provide appropriate clothing/ equipment to all employees and enforce effective usage overalls, safety boots, helmet, e.t.c
- > Provide expert specialized support in crisis and emergency situations.
- Control of subcontractors and enforcement of the safety and other regulations.
- Ensure that all site accidents are reported and documented and followed up and precautionary measures taken to prevent re-occurrences.
- Train new employees on health and safety matters.

8. HIV AND AIDS POLICY STATEMENT

Image does not and will not unlawfully discriminate against employees or any individuals living with or affected by HIV or AIDS. Regular seminars will be conducted by safety and Health Officials with the company to conduct and appraise employees on matters of HIV and AIDS. Periodically, national HIV and AIDS officials will be invited to come and talk/discuss HIV/AIDS issues with the employees.

IMAGE CIVIL ENGINEERING QUALITY CONTROL POLICY. GENERAL

Quality assurance can only be realized through the implementation of various administrative systems specific to company operations. Image does not operate in isolation, therefore quality management systems of other participating entities and stakeholders are also important in achieving the desired

results. whilst implementing a quality management system is a matter of individual organizations, employees of the company in providing the services and supplying materials will be required in order to operate a quality assurance scheme to approved excellence. All entities providing materials and services to the project will have to adhere to the main contractor's quality.

QUALITY MANAGEMENT SYSTEM

Our Quality management system (QMS) Comprises of a number of specialized elements that incorporate Communication links that relate them in a hierarchical structure. These procedures and links provide a formal system that leads itself to monitoring and self-auditing of the entire construction from the design to completion of the desired product. The quality management system encompasses all parties involved in the process and requires that each party operates within and conforms to its own quality management system and international standards. With this in mind, IMAGE, its subcontractors and other specialist suppliers and subcontractors will adhere to international standards of quality management systems (QSM).

BASIC MATERIALS GENERALLY

Quality of contract (as a base material) will be closely monitored and controlled. Test cubes will be crushed at 7 days and 28 days by an approved independent material Testing Laboratory as required. Field density tests for monitoring and control of the compaction of bulk earth works will be carried out. Procurement of services, goods and storage of materials will be monitored. Sample and mock- up of standards will be prepared and presented for the approval of the project Engineer/Consultant.

PROGRESS MONITORING

Image is well conversant with AUTOCAD, STAAD Pro, ETABS, SAP2000 Microsoft project, Excel and Microsoft word which are the programmes used for the delivery of construction works. This will be monitored closely and reviewed and or up-dated regularly. This programme will also incorporate subcontractor's elements in order to present a holistic approach to project monitoring and Control.

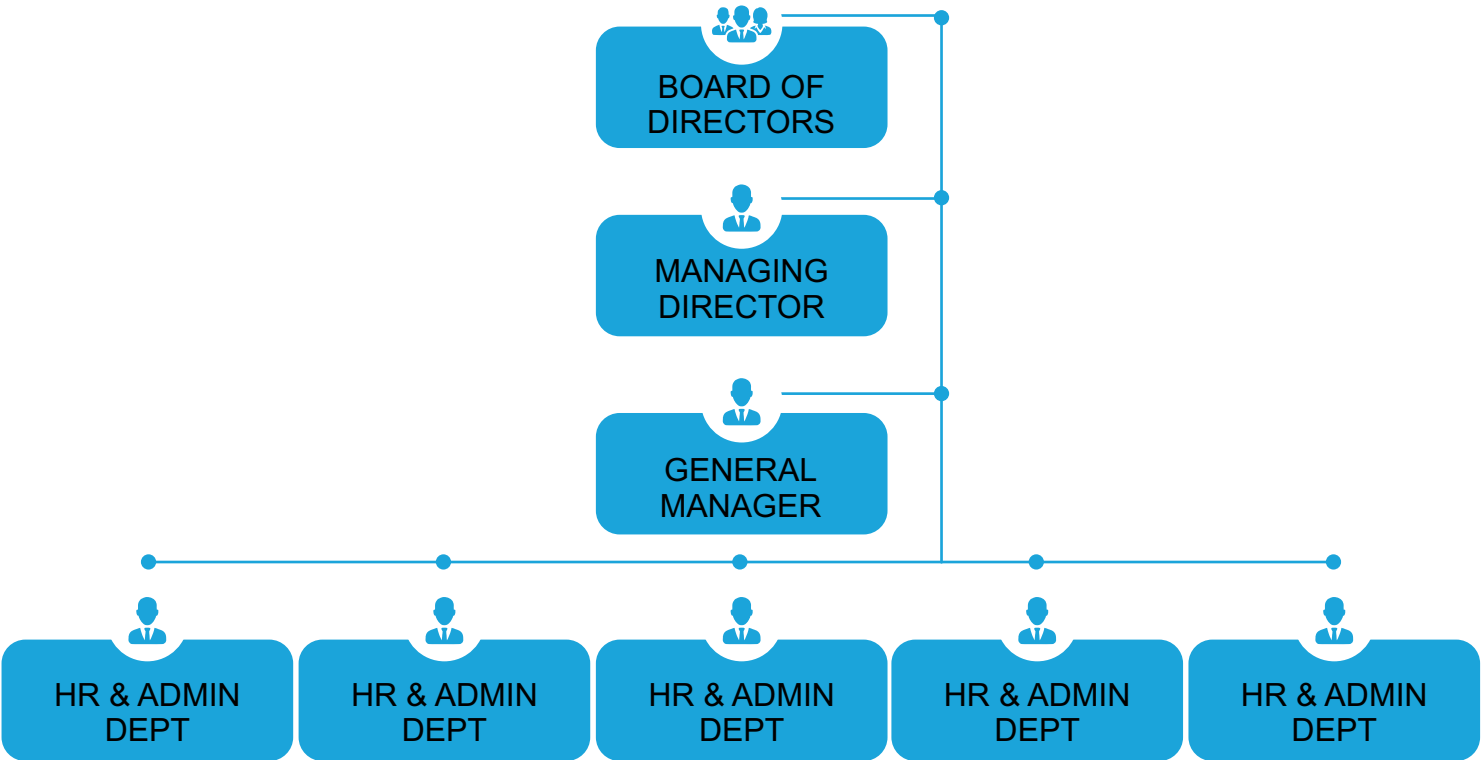

GENERAL SUMMARY

IMAGE CIVIL AND ELECTRICAL ENGINEERING LTD. Is a one stop solution for high quality, within time and cost effective construction works. The company is managed by professionals and will give professional services to the entire satisfaction of the client.

CIVIL ENGINEERING LTD

'Govt committed to infrastructure rehabs'

MPOSHA

MARY LEMBA
Ndola

MINISTER of Green Economy and Environment Mike Mposha says Government is committed to rehabilitate infrastructure at the Zambia Forestry College in Kitwe district to respond to the growing population at the institution.

Mr Mposha said there is increased enrolment at the institution, hence the need to expand and refurbish the college.

He said this when he commissioned a newly-constructed water reticulation system at the institution by Image Civil Engineering Company Limited at a cost of over K1.5 million.

Mr Mposha said the water reticulation system will enhance provision of water to over 2,000 people who include students, school staff and nearby communities

He urged students and the surrounding communities to guard the infrastructure against vandalism as Government is spending huge sums of money to install such facilities.

And Zambia Forestry College principal Richard Banda hailed Government for allocating funds to see water challenges at the institution addressed.

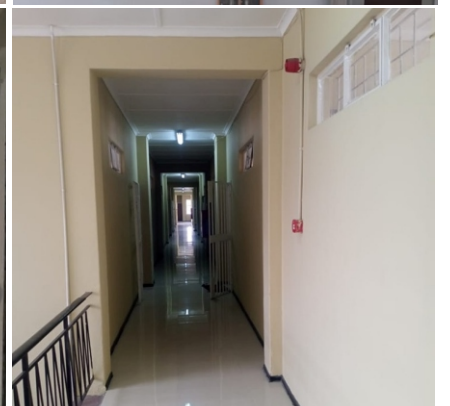

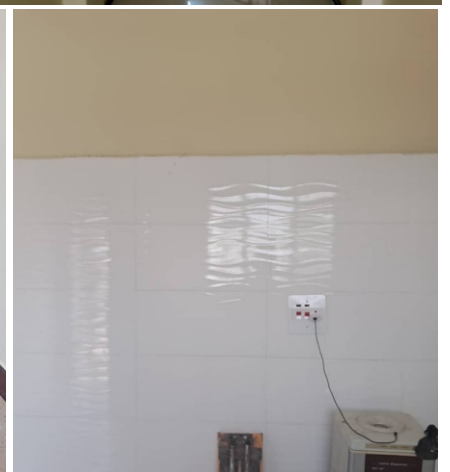

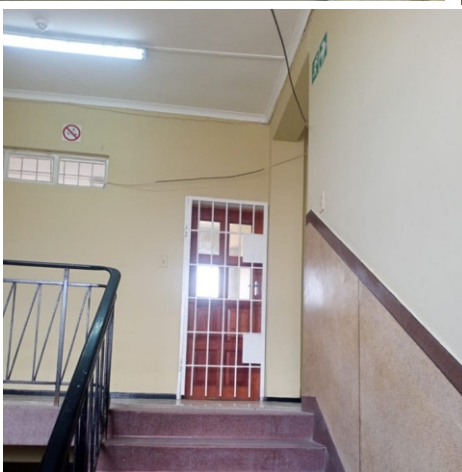

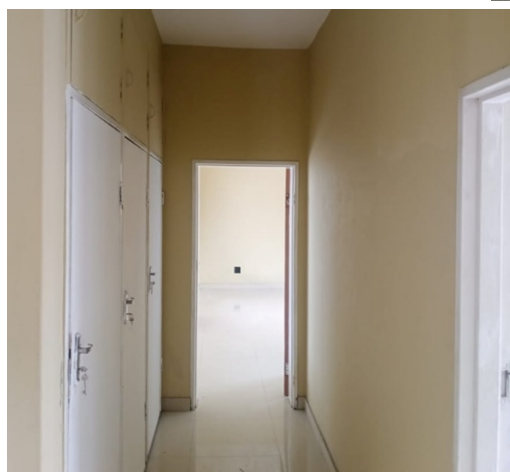

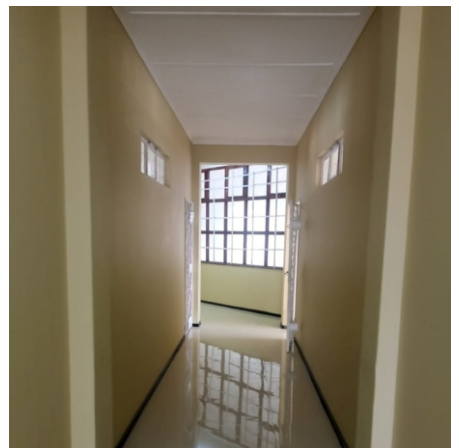

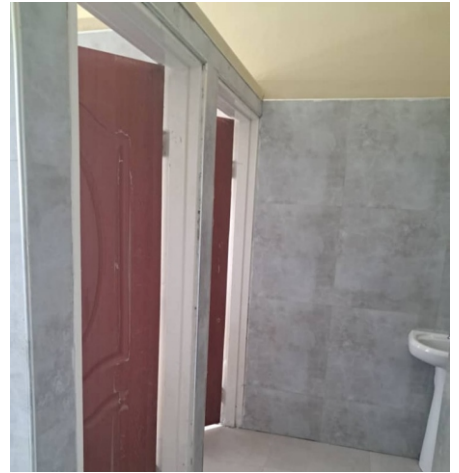

Mr Banda said once the project is finished, the college and surrounding households will have access to clean water and sanitary facilities.

Image Civil Engineering Company Limited managing director Jonathan Mwendabai said phase one of the project has been completed, which has seen an improvement in the supply of water at the college.

He said phase two and phase three, once done, will enhance provision of water to student hostels and the community.
